

Livestock Treatment & Withdrawal Log

Every treatment, its withdrawal window, and the clear-to-sell date in one row.

How to use this sheet. Record a treatment the day it happens. Copy the meat and milk withdrawal periods from the product label onto the row, add them to the treatment date, and write the resulting clear date in the last column. An animal is not clear for sale, slaughter, or milk until that date has passed. Fill every field, even when the answer is none.

Farm / operation: _____ Year: _____ Page: _____

DATE	ANIMAL / GROUP ID	PRODUCT USED	DOSE & ROUTE	REASON	MEAT WD	MILK WD	CLEAR TO SELL	BY
