

Planting & Harvest Log

One row per planting, from seed in the ground to the lot code that leaves the farm.

How to use this sheet. Open a row when you plant. Give each planting a field and a variety, and assign a harvest lot code you can trace forward to the customer and backward to the inputs applied to it. Record the planting and harvest dates as they happen, not from memory at season end. A blank lot code breaks the trail silently, so fill it in every time.

Farm / operation: _____ Year: _____ Page: _____

FIELD / BLOCK	CROP & VARIETY	PLANTED	AREA	SOURCE / SEED LOT	HARVESTED	YIELD	HARVEST LOT CODE
