

Spray & Input Record

Every application, with the intervals a buyer or inspector will ask you to prove.

How to use this sheet. Record an application before you leave the field. Enter the product, the rate, the target, and the field or lot it went on. Copy the pre-harvest interval and re-entry interval from the product label, then note the earliest date each allows. Add the weather, because a drift question is answered by the conditions at the time, not later.

Farm / operation: _____ Year: _____ Page: _____
